Unlike RAID 0, there is no speed increase from BIG mode. You can also use different sized disks in a Spanning array. But as with RAID 0, if one drive fails, the entire BIG volume will be lost, along with any potential data. You'll probably want a third separate drive in which to backup your most critical data. Armoured cavalry (or U.S. armored) are combat units using armoured fighting vehicles (AFVs) instead of horses. They began to replace horse cavalry as the reconnaissance, screening and exploitation/pursuit arm in most armies after the First World War, although many armies continued to maintain horse cavalry through the end of the Second World War. Armoured cavalry differs from regular armoured ...
