

TRIGONOMETRIC IDENTITIES STUDY GUIDE AND INTERVENTION WORK

Jan 18, 2021

[Trigonometric Identities Study Guide And Intervention Work](#)

5-1 Study Guide and Intervention Trigonometric Identities Basic Trigonometric Identities An equation is an identity if the left side is equal to the right side for all values of the variable for which both sides are defined. Trigonometric identities are identities that involve trigonometric functions. Reciprocal Identities Pythagorean Identities

5-3 Study Guide and Intervention (continued) Solving Trigonometric Equations Use Trigonometric Identities to Solve You can use trigonometric identities along with algebraic methods to solve trigonometric equations. Be careful to check all solutions in the original equation to make sure they are valid solutions.

[Section 5.2 Verifying Trigonometric Identities](#)

All methods require us to use U-Substitution and substituting with trigonometric identities. In addition, the trigonometric functions we are dealing with are products of sine and cosine with powers. There are a total of 3 cases. The first case is when the power of cosine is odd. The second case is when the power of sine is odd. Lastly, the third case is when both the powers of sine and cosine ...

In mathematics, trigonometric identities are equalities that involve trigonometric functions and are true for every value of the occurring variables where both sides of the equality are defined. Geometrically, these are identities involving certain functions of one or more angles. They are distinct from triangle identities, which are identities potentially involving angles but also involving ...
